In response to Shawn Rhea's "CEO IT Achievement Awards: Technology head start":

This is a picture-perfect example of how strategies with foresight that align information technology with long-term business imperatives lead to market-leading positions. In fact, with the new administration's strong focus on healthcare IT, third-party services like Concord (N.H.) Hospital's electronic health-record service are bound to be the fastest and most economical way for many hospitals to quickly capitalize on funding provided by the stimulus bill.
